Subject: RE: Kern Valley State Prison 1510802 - Arsenic Treatment plant status

Thanks Linda!!

Tricia Wathen, P.E.
District Engineer, Visalia District

We're in a drought and the governor is asking Californians to reduce their water use by 20%. Take shorter showers. Fix broken sprinklers. Check for leaks. For more tips on how to conserve at home, visit saveourh2o.org. Or follow Save Our Water on Facebook and Twitter.

Subject: Kern Valley State Prison 1510802 - Arsenic Treatment plant status

Hello Corine,

Per your request on the status of the Kern Valley State Prison's arsenic treatment. Arsenic treatment is in place and the treatment plant was put online in January 2013. Recent data from the treatment plant show levels ranging from 3 ug/L to 6 ug/L.

Please let us know if there is any other information you may need.

Respectfully,

Linda Ramirez
